

# SAA-DALLAS IMPACT REPORT

SWIM ACROSS AMERICA  
2024 GRANT  
**\$145,000**

## OUR LOCAL BENEFICIARY

SAA-DALLAS HAS  
RAISED OVER  
**\$3.5 MILLION**  
TO FIGHT CANCER  
SINCE 2011

## GRANT RECIPIENT

Dr. Ronan Kelly

Dr. Kelly is exploring the use of detecting tiny particles called extracellular vesicles in the blood and urine of patients with suspicious lung nodules on CT scans to determine if they are cancerous or benign lesions. Ideally, this will result in a decrease in the number of individuals who need invasive lung biopsies and can reassure patients that no cancer is present.

**RESEARCH
